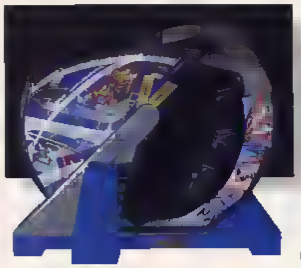
WARNING:

DON'T TURN THIS PAGE IF YOU ARE EXPECTING JUST ANOTHER VIDEO GAME.

It's you against a swarm of supersonic enemy fighters... deadly heat-seeking missiles... laser-directed anti-aircraft fire...and body-jarring, brain-numbing G-forces.

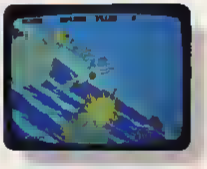
AFT
BUR



But no matter who wins, you win. *Sight* and *sound* take AFTER BURNER players two-thirds of the way into the adrenalin-pumping world of the supersonic jet pilot... *motion* completes the journey. SEGA has combined astonishing 3-D graphics and rich stereophonic sound in an enclosed cockpit that features the pitch and yaw of a real jet fighter. Push the stick forward and your fighter pitches forward... bank right and you feel the G-forces build as your aircraft rolls right. A hand throttle; seat-belt; warning beacons; and a control stick with missile-launch and rapid-fire cannon triggers, complete the layout. Players move through 23 progressive stages ranging from dogfights to raids on enemy ground installations. On-screen graphics include target "lock-on" and rear-scanning radar. AFTER BURNER is as close as you can get – without enlisting – to the realism of a supersonic dogfight. That means one thing – repeated play. So, no matter who wins the game... you win the profits. Call your authorized SEGA distributor for a closer look at AFTER BURNER.

Players "feel" the launch of a missile or the impact of enemy fire through the control stick on the upright model.

The deluxe AFTER BURNER features four-way cockpit rotation.



All the play features of AFTER BURNER are included in the compact upright model.
